

First IWOGL Announcement:

Dear colleagues,

We would like to advertise the 10th International Workshop on Graph Labeling (IWOGL), to be held at Ball State University in Muncie, Indiana, USA on September 26-28, 2018.

A website with preliminary information can be found at <http://www.cs.bsu.edu/iwogl/>.

The scientific program of the workshop will consist of both invited and contributed talks in all areas related to graph labeling.

A registration page, including information about abstract submission, will soon be available on the IWOGL website. The early registration deadline for the conference will be August 1, 2018, with an early registration fee of \$200. We hope to have some travel assistance available for students and young researchers, and are planning a conference banquet on Thursday, September 27.

Just after IWOGL, the 60th Midwest Graph Theory Conference (MIGHTY LX) will take place at Indiana University-Purdue University Fort Wayne, in Fort Wayne, Indiana, on September 28-29, 2018. We expect that many researchers may be interested in both conferences, and are making plans to provide travel from Muncie to Fort Wayne for some participants on September 28. For more information on MIGHTY, see <http://www.cs.bsu.edu/homepages/mighty/>.

Please feel free to forward the information about IWOGL and MIGHTY to anyone else who might be interested, or to contact us at IWOGL@bsu.edu.

Best wishes,

The IWOGL organizing committee
