

# Student Engagement and Retention Tool

Developed By Brenden Jones, Alec Northouse and Isaac McKinney

## Tech Stack

- Front-End:
- HTML
  - CSS
- Back-End:
- PHP
  - MySQL

## Our Company Partner

Our company partner is StudyTable (formerly Tudr), and they're known for their app of the same name (which was also formerly called Tudr). Our Contact Was Wesley Crouch, One of the Co-Founders

## Goals

Our goals for the project were to provide a way for professors to supply information and questions about a course, and then for students to be able to access that information in one area.

## Our Project

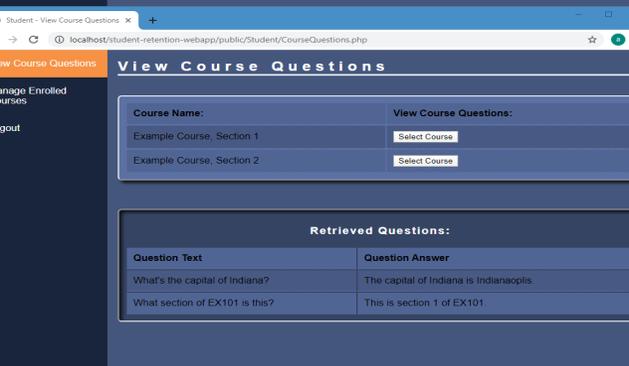

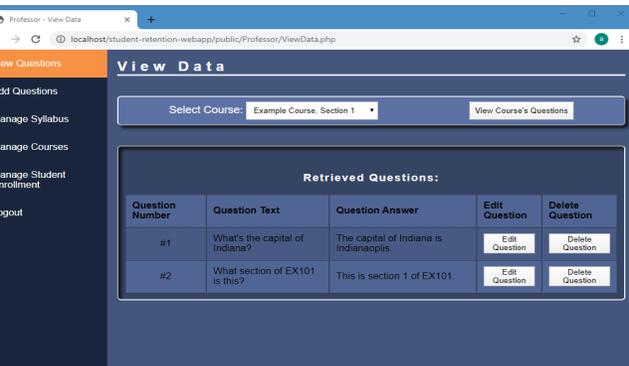

Our project is a Web based Dashboard for students and Professors to use and keep all Class information at the click of a mouse.

## Conclusion

Our project to have a dashboard where professors can provide information and students can access it was a success and failure.

## Features

- Professors can input syllabus information and class questions
- Students can access all relevant information on one page
  - Students and Professors can add, drop, and create courses
